Data Engineer — 4.5 Years — Azure, Spark, Airflow, GCP, AI Agents

SKILLS

Core:	Spark, PySpark, Python, SQL, Airflow, Delta Lake, Kafka
Cloud & Data Platforms:	Azure (Fabric, Databricks, Data Factory, Synapse), GCP (BigQuery, Composer, Dataproc), Snowflake
AI & GenAI:	LangGraph, Multi-Agent Systems, Prompt Engineering, Google ADK
DevOps & Tools:	Docker, Git, dbt
Core Concepts:	System Design, Distributed Systems, Agile

EXPERIENCE

Software Development Engineer (Data & AI) <i>Sigmoid Analytics</i>	Sept 2024 – Present
--	---------------------

- Improved multi-agent Text-to-SQL accuracy from 42% to 85% on a benchmark test set, reducing manual SQL curation effort by 60% by architecting a multi-agent system with schema discovery and query validation.
- Reduced Power BI query latency by 65% by designing an Azure Databricks Medallion Architecture handling 500GB+ daily data with partitioning, Delta optimizations, and SCD Type-2 modeling.
- Reduced data pipeline downtime by orchestrating end-to-end workflows with Azure Data Factory across distributed Databricks pipelines, implementing automated retries, alerting, and failure handling.
- Reduced LLM hallucinations from 38% to 14% by designing CoT-driven prompting strategies, stabilizing agent behavior across complex business queries.

Data Engineer <i>Accenture</i>	Oct 2021 – Sept 2024
--	----------------------

- Migrated 1TB of on-prem data to Google Cloud, handling historical datasets and 40–50GB daily incremental loads using Cloud Composer, Dataproc, and BigQuery.
- Scaled Airflow orchestration to 800+ DAGs with zero code duplication by building a regex-driven framework that decoupled ingestion logic from parameters.
- Validated 500K+ insurance reimbursement claims against US government pricing standards and flagged duplicate/fraudulent claims by building analytics pipelines on Azure Databricks Delta tables, delivering results to the client for compliance review.

CERTIFICATIONS

Google Associate Data Engineer (GCP)		Microsoft Fabric Analytics Engineer Associate
Microsoft Azure AI Engineer Associate		Databricks Certified Associate Data Engineer

EDUCATION

Bachelor of Technology in Computer Science , Rajasthan Technical University	2017 – 2021
--	-------------

ACHIEVEMENTS

- Won company-wide hackathon at Sigmoid Analytics by building a config-driven, no-code ETL accelerator on Microsoft Fabric. Deployed to a client engagement to accelerate Fabric pipeline creation.
- Mentored 8 interns in designing a Medallion Architecture-based data pipeline and building a Streamlit dashboard for ad-driven revenue metrics.
